EDUCATION

High school (10th grade)
OLF CONVENT SCHOOL
97.4%

Senior secondary (12th grade)
DAV School
Jan 2022
87%

BTECH (CSE-AIML)
VIT Bhopal
Jan 2027

SKILLS

Programming Languages: Python, C
Frameworks & Libraries: TensorFlow, scikit-learn, OpenCV, BERT
Tools & Platforms: Streamlit, Flask, Git, AWS Cloud
Concepts: Data Structures, Algorithms, Machine Learning, NLP, Computer Vision

LANGUAGES

Python (Advanced)

ABOUT MYSELF

Aspiring AI/ML Engineer and Software Developer with hands-on internship experience in machine learning projects. Skilled in Python, C, and frameworks like TensorFlow and scikit-learn, with practical knowledge of data structures and algorithms. Completed multiple projects including predictive modeling, NLP, and computer vision, demonstrating strong problem-solving and analytical skills. Certified in advanced AI and machine learning courses, eager to contribute and grow in a dynamic engineering internship environment.

EXPERIENCE

Machine Learning Intern at Edu-versity

05/2024 – 08/2024 | Gurugram

- Developed and tested machine learning models using Python, TensorFlow, and scikit-learn through structured technical training and hands-on project work to address educational data challenges.
- Processed, cleaned and performed data analysis on large datasets, leveraging analytical skills to improve data quality and model performance.
- Communicated and collaborated with a small team, making key decisions to identify features and solve problems by optimizing model parameters, which improved prediction accuracy.
- Assisted in deploying machine learning pipelines and gained exposure to end-to-end model lifecycle management.
- Participated in regular code reviews and troubleshooting sessions to enhance workflow efficiency.
- Demonstrated networking skills through active participation in PR and outreach activities at a startup, including coordinating communication with Shark Tank founders.
- Adapted to dynamic project requirements and rapidly learned new internal software tools to support project delivery.
- Applied foundational engineering principles and STEM knowledge in developing AI/ML solutions.
- Followed Health, Safety, and Environment (HS&E) guidelines during project execution to ensure compliance.
- Contributed to project management activities by tracking progress and coordinating with team members to meet deadlines.

CERTIFICATIONS

Complete A.I. & Machine Learning, Data Science Bootcamp - Udemy

Artificial Intelligence A-Z 2025: Agentic AI, Gen AI, and RL - Udemy

100 Days of Code™: The Complete Python Pro Bootcamp - Udemy

AWS Technical Essentials - Amazon

Official Practice Set: AWS Certified Cloud Practitioner - AWS

PROJECTS

MOVIE RECOMMENDATION

- Built a collaborative filtering model using SVD and KNN algorithms to recommend movies based on user ratings.
- Achieved 85% accuracy on the MovieLens dataset.
- Deployed as an interactive web app using Streamlit for user-friendly access.

Pneumonia Detection from X-rays

- Trained a ResNet-50 convolutional neural network to classify pneumonia in chest X-rays with a 92% F1-score.
- Preprocessed DICOM images using OpenCV, reducing false positives by 15%.
